

Vaibhav Kaul

Full Stack Engineer (Backend-Focused) | Node.js, Python, Real-time Systems

📞 +91 9429090492 ✉ vaibhavkaul18@gmail.com 🌐 Portfolio 📍 Vadodara, Gujarat, India

PROFESSIONAL SUMMARY

Full Stack Engineer with 2 years of experience specializing in backend systems using Node.js and Python. Experienced in building scalable APIs, real-time systems using WebSockets, and cloud-based architectures on AWS. Strong in designing efficient data pipelines, integrating third-party APIs, and developing production-ready applications with a focus on performance and reliability.

Skills

- **Backend:** Node.js (Express), TypeScript, Python (FastAPI), Serverless Framework, REST & GraphQL
- **Cloud & Infrastructure:** AWS (Lambda, S3, RDS, EventBridge, SNS/SQS), Docker, CI/CD (GitHub Actions)
- **Databases & Search:** PostgreSQL, PGVector, LLM Orchestration, RAG Pipelines
- **Frontend:** React 19, Next.js (App Router), Tailwind CSS, HTML/CSS
- **Tools & DevOps:** Git, SDK Development, API Integrations

Work Experience

- **Easy Cater Services Platform Private Limited** Vadodara, Gujarat
Software Developer June 2026 – Present
 - Optimized critical APIs responsible for the implementation of trending items in the application, reducing response time from 2s to 200ms.
 - Developed and implemented robust logic for the calculation of delivery fees.
- **eDelta Corporation** Surat, Gujarat
Software Developer June 2024 – May 2026
 - **E-commerce Protection & Warranty Platform (ProtectALL)**
 - Developed a cross-platform middleware (Shopify, BigCommerce, WooCommerce) to centralize warranty selection and pricing logic across diverse merchant environments.
 - Developed high-performance **Excel/CSV ingestion pipelines** with automated validation (headers, dates, pricing), reducing bulk product-plan assignment from minutes to under 5 seconds.
 - Implemented **Shopify Cart Transformers** and **Theme App Extensions** for dynamic UI/UX; utilized **AWS Secrets Manager** for secure multitenant configuration in BigCommerce.
 - **VoiceNow AI Infrastructure & SDK**
 - Built a real-time WebSocket backend using FastAPI and Python for low-latency audio streaming and event-driven processing.
 - Developed a multi-tenant serverless API using AWS Lambda and RDS, integrating EventBridge for scheduled workflows and PGVector for contextual data retrieval.
 - Developed a cross-platform TypeScript SDK (React/Angular) with CI/CD via GitHub Actions for seamless enterprise integration.
 - Designed a real-time cost-calculation ledger to monitor multi-provider API usage (OpenAI, ElevenLabs).
 - **Omnichannel Connectivity (TextNow)**
 - Integrated Meta Graph API for WhatsApp and Instagram, orchestrating content delivery through a unified TextNow API.
 - Designed a webhook routing system to dynamically handle multi-channel requests across messaging platforms.
 - Built a custom intent classification engine using LLMs and system prompts; implemented a subscription module using Stripe.
- **eDelta Enterprise Solutions Pvt. Ltd.** Ahmedabad, Gujarat
Software Engineering Intern Dec 2023 – June 2024
 - **No-Code AI Studio & Web Widget Interaction Layer**
 - Built a **node-based flow builder** using **React Flow** to design bot logic through an interactive nodes-and-edges architecture.
 - Developed a **customizable chat widget** as a standalone interaction tool that connects to central applications to facilitate real-time bot conversations.
 - Implemented **S3-backed secure media delivery** within the widget using signed URLs to ensure low-latency loading of multimedia assets.

Projects

- **Society Sync (SaaS ERP):** Developed a multi-tenant ERP for residential societies using **React (Vite)**, **Express**, and **Prisma/Postgres**. Implemented role-based access control (RBAC) and ensured data consistency using transactional database operations. Integrated a **Shadcn UI** dashboard with **Visitor Pre-Approval**, **Community Polling**, and **Amenity Booking** systems.
- **Voxia (Open-Source Voice Agent):** Architected an open-source alternative to VoiceNow using entirely open-source models (local LLMs, STT, TTS), eliminating third-party API dependencies while ensuring low latency and full data privacy.

Education

- **Dharmsinh Desai University** Nadiad, Gujarat
Bachelor of Technology in Computer Science Technology; CPI: 7.65 Passed in 2024
