

Vaibhav Kaul

Full Stack Engineer | Node.js • TypeScript • Next.js • Python • AWS

+91 9429090492 vaibhavkaul18@gmail.com vaibhav-kaul.web.app Vadodara, Gujarat, India

Professional Summary

Full Stack Engineer with 2+ years of experience building backend APIs, real-time systems, web applications, and cloud-based platforms using Node.js, TypeScript, Python, PostgreSQL, React, Next.js, and AWS. Experienced in API integrations, WebSockets, serverless systems, e-commerce platforms, LLM/AI applications, and real-time location workflows. Improved production API response times from ~2s to ~200ms and reduced bulk data-processing time by ~90%.

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3
- **Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs, WebSockets, Socket.IO, Microservices, API Integrations, Prisma, TypeORM
- **Frontend:** React.js, Next.js, React Flow, Tailwind CSS
- **Databases & Storage:** PostgreSQL, Amazon RDS, PGVector, AWS S3
- **Cloud & DevOps:** AWS (Lambda, API Gateway, S3, RDS, EventBridge), Docker, GitHub Actions, CI/CD, Git, Linux, Semantic Release
- **AI & Integrations:** LLM Integration, RAG, LangChain, GPT-4o, Gemini, STT/TTS, VAD, Twilio, Shopify, BigCommerce, WhatsApp, Dialogflow

Professional Experience

- **Easy Cater Services Platform Private Limited** **Vadodara, Gujarat**
Software Developer | Full Stack / Backend Focus *June 2026 – Present*
 - **API Performance Improvement:** Reduced redundant database calls and streamlined data retrieval for restaurant and catalog APIs, reducing response times from **~2s to ~200ms**.
 - **Platform Integration:** Worked across the User, Delivery, and Merchant applications, resolving production issues, implementing changes, and optimizing frontend and backend workflows across the platform.
 - **GIS & Delivery Integration:** Integrated the existing GIS server and routing services with the Delivery Backend, implementing the APIs required to exchange driver-location and routing data with the GIS server.
 - **Live Driver Tracking & Map Integration:** Implemented location update and tracking APIs across the Delivery and User backends and integrated the tracking flow into the user application, including smooth rider movement between location updates.
 - **Order Lifecycle:** Implemented and maintained backend workflows covering order placement, merchant acceptance, preparation/ETA, driver assignment, pickup, and delivery.
- **eDelta Corporation** **Surat, Gujarat**
Software Developer | Full Stack *June 2024 – May 2026*
 - **ProtectALL – E-commerce Protection & Warranty Platform:**
 - * Developed shared warranty-selection and dynamic-pricing logic across Shopify, BigCommerce, and WooCommerce, with platform-specific integrations for each storefront.
 - * Built automated **CSV ingestion pipelines** with validation, reducing bulk product-plan assignment time from minutes to **under 5 seconds, a ~90% reduction in processing time**.
 - * Implemented **Shopify Cart Transformers** and **Theme App Extensions** for dynamic warranty-plan rendering on product pages.
 - * Developed **BigCommerce Widget API** integrations to dynamically display personalized warranty plans within the storefront.
 - **VoiceNow – Real-Time AI Voice Platform & SDK:**
 - * Built a multi-service real-time voice platform with separate management and admin applications, each backed by its own serverless API, alongside a dedicated Python WebSocket microservice for the voice pipeline.
 - * Developed a WebSocket-based real-time voice pipeline orchestrating **VAD → STT → LLM → TTS** for conversational audio processing.
 - * Implemented organization-level authentication and **LangChain/PGVector-based RAG workflows** with **AWS S3** for document knowledge-base ingestion.
 - * Developed and published the **VoiceNow NPM SDK**, with automated versioning and CI/CD using **GitHub Actions** and **Semantic Release**.

Professional Experience (Continued)

- **eDelta Corporation (Continued)**
Software Developer | Full Stack
 - **XUnified – Omnichannel & AI Platform:**
 - * Integrated WhatsApp, Facebook, Instagram, and Telegram APIs into the platform’s common application/channel layer, connecting third-party messaging services with the platform’s communication workflows.
 - * Built AI-agent configuration functionality allowing users to select OpenAI/GPT or Gemini models and API keys and provide knowledge sources such as files, links, and text for their agents.
 - * Continued development of the **AI Studio** no-code bot builder, allowing users to create conversational flows with messages, buttons, files/media, and other response logic for supported channels.
 - * Integrated **Google Dialogflow** agents into the platform so configured agents could be connected to the corresponding communication channels through the application layer.
 - * Contributed to WhatsApp business-template and broadcast workflows, including template-based message handling and contact delivery flows.

Surat, Gujarat
June 2024 – May 2026
- **eDelta Enterprise Solutions Pvt. Ltd.**
Software Engineering Intern
 - **AI Studio – No-Code Conversational Bot Builder:** Built a **React Flow**-based no-code bot builder that allowed users to visually create conversational flows using messages, buttons, files/media, inputs, and conditional logic.
 - Implemented backend validation and execution logic for configured bot flows and integrated the resulting conversations with the platform’s channel layer.
 - Built a customizable **React chat widget** connected to backend automation through REST/WebSocket integrations.

Ahmedabad, Gujarat
Dec 2023 – June 2024

Key Projects

- **Society Management System – SaaS ERP:** Built a multi-tenant residential management platform using **Next.js**, **Express.js**, **Prisma**, and **PostgreSQL**. Implemented **RBAC** and an immutable transaction ledger for tracking billing and financial activity.
- **Voxia – Local Voice AI Pipeline:** Reimplemented the VoiceNow voice pipeline using locally hosted LLM, STT, and TTS models instead of third-party AI APIs, exploring a more self-contained voice-processing architecture.

Education

- **Dharmsinh Desai University**
Bachelor of Technology in Computer Engineering | CPI: 7.65
- Nadiad, Gujarat**
Graduated 2024
